Titled Work(s): Messing About in Boats (full run)

Rights owner name: Bob Hicks

Dear Rights Owner:

Thank you for contributing your work to the Internet Archive digital lending library. You are joining a long list of creatives who have similarly chosen to expand public access to their work for today and future generations.

The Internet Archive's digital lending library works just like a traditional library by allowing a patron to check out works for a limited period of time. The Internet Archive uses digital rights management and technical controls to allow a patron to check out one digital version of your work at any time to read on a computer or other device. These industry standard controls ensure that the patron can only access the work for the duration of the check-out period and prevents further copying and distribution.

The Internet Archive digital lending library does not change the copyright status of the underlying work. This means you retain the same rights when a work is loaned as you would with a physical work. As a rights holder, you can decide how many simultaneous copies Internet Archive may lend at any time, and whether Internet Archive should apply technical controls at all. Please consider the following options and select one for each Titled Work.

**Number of Copies:** You may decide how many copies of your book will be made available, which will permit one person to read a copy at a time.

**No Technical Restrictions:** You can make your book available with no technical restrictions which will permit an unlimited number of patrons to check-out your book at the same time and permit them to download and redistribute the book. Making your book widely available in this way does not change the copyright status of the book.

You can also use a rights statement to make your book more available to allow patrons to freely use your work in certain ways while limiting other uses, for example, to allow patrons to copy and adapt portions of your book, but not for commercial purposes. The Internet Archive does not endorse or enforce rights statements. By default, all copyrights are reserved. However, if you would like to increase the availability of your book to enable patrons to share your book with others, you may wish to select a license from Creative Commons licenses.

Titled Work:

☐ I would like to make \_\_\_\_\_ copies available for lending.

or

☒ I would like to make this work available with NO TECHNICAL RESTRICTIONS
